

**Alain Picard Workshop**  
**“The Painterly Portrait”**  
**May 18 – 20, 2018**

Hampton Inn & Suites Richmond-Virginia Center  
1101 Technology Parkway,  
Glen Allen, VA 23059  
804-261-2266

**About the Workshop**

In this workshop, we will learn how to light, pose, sketch and photograph our portrait subject, and work from studies and photographic reference materials to create lifelike painterly portraits.

Alain will begin day one with a pastel portrait demonstration of the painterly approach to pastel, using the live model. This demonstration covers explanations of pastel portrait techniques for creating an accurate likeness, establishing clear values, massing in the portrait, evaluating color relationships and selecting skin tones, developing a painterly style, and harnessing the power of strong design. We'll also cover strategies for successful posing and lighting of the subject whether in studio or on location, with children or adults. Students will sketch from the live model, creating their own exploratory studies, compositional approaches and color notes, honing in on their portrait composition.

We will all photograph our models together in a guided photo-session, discussing how to capture strong reference material using a digital SLR or mirrorless digital camera, and even how to get better results from your iPhone. Days two and three of the workshop will be devoted to developing our portraits from the photographic reference we've gathered. Students can also choose to bring their own portrait references to work from. We will be learning how to use this reference as a tool in creating lifelike painterly portraits. Alain will demonstrate how to develop and refine a portrait started from life by using photographic reference. He'll also demonstrate a complete portrait study from a photograph start to finish, revealing how it can be used as a tool to create fresh, loose lifelike portraits. We will cover effective techniques for refining your portrait and end with a constructive critique. You will leave feeling empowered with working knowledge to create your own painterly portraits from photographs.
